ENTERPRISE LEARNING SOLUTIONS

Skills and Competency Profiling

TrendsNet provides Skills Gap Analysis (SGA) services to ensure that education is targeted at the role-level within an organisation. This increases the effectiveness of recommended staff trainings with a minimum amount of operational disruption.

Training Needs Analysis

Opening up the full skills framework to all staff will carry out a full skills audit of all staff against a given framework as opposed to individual roles. TrendsNet can draw on its considerable experience of training needs analysis and skills mapping to help business construct a competency database to evaluate and monitor the growth of competencies across the organisation.

Curriculum Design and Content Development

The learning needs and styles of an individual vary and so it is not always appropriate for a learner to attend a standard ILT course. Our Learning Consultants are able to factor in these demands into a learning programme. By conducting a TNA and Skills Gap Analysis we are not only able to assess the level of knowledge that the learner already has, but measure that level of knowledge against the skills required to do their job. Our Instructional Designers then develop content that addresses all of the skills gaps, using either newly created content, generic content or a combination of the two.

Customized Education Delivery

Using our considerable expertise and resources we are able to customise and deliver training solutions that are tailored-fit with our customer's business needs.

Competency Assessment

The assessments enable the customer to identify an existing or future skill gap to ensure that skills are aligned with business needs. Our Online Assessment Tool (OAT) will evaluate the skills to measure existing knowledge for a better chance at passing a Certification Exam.

Testing Delivery Service

TrendsNet is an accredited Pearson VUE and Thompson Prometric Testing Center. These partnerships and associated experiences give us the knowledge, credence and infrastructure to enable us to help companies assess and test their staff during the deployment of any training programme.

Facility Rental and Training Administration

Located at the heart of country's business center, our state-of-the-art Education Center facilities create a complete training experience for our customers.
